ARKIV FÖR FYSIK

UTGIVET AV

KUNGL. SVENSKA VETENSKAPS-

AKADEMIEN

Band 24

Med 43 avhandlingar

ALMQVIST & WIKSELL

STOCKHOLM

GÖTEBORG · UPPSALA

1963

Häfte 1 innehållande Nr 1– 8 utkom den 13 juni 1963
» 2–3 » Nr 9–20 » » 14 » 1963
» 4–5 » Nr 21–34 » » 22 aug. 1963
» 6 » Nr 35–43 » » 24 sept. 1963

TJUGOFJÄRDE BANDETS INNEHÅLL

Sid.

1. Eriksson, T. A. and Rinander, G. A., A comparison of the semi-classical approximation and the exact solution of the optical model scattering problem 1–15
2. Jacobsson, R., Optical properties in the near infrared of thin Ge-ZnS films produced by simultaneous evaporation from two sources 17–30
3. Erlandsson, B. and Valli, K., An investigation of the gamma-ray decay from five resonances in the reaction $Sc^{45}(p, \gamma)Ti^{46}$ 31–48
4. Pettersson, E. and Lindholm, E., Dissociation of propane molecule ions formed in charge exchange collisions with positive ions. Ion-molecule reactions of propane 49–68
5. Zuk, W. and Gustafsson, S., Gamma-gamma angular correlation and intensity measurements on low energy gamma rays in the decay of Ce^{144} 69–77
6. Block, E., A property of the Ising Model on the diamond lattice 79–80
7. Brogren, G. and Hörnström, E., The anomalous X-ray transmission through silicon single crystals 81–88
8. Persson, L., Gamma ray coincidence studies on the decay of Dy^{165} . . 89–96
9. Matthias, E., Schneider, W. and Steffen, R. M., Nuclear level splitting caused by a combined magnetic dipole and non-axially symmetric electric quadrupole interaction 97–111
10. Beckman, O. and Bergvall, P., Doping properties of $Bi_2 Te_{2.7} Se_{0.3}$ . . 113–122
11. Egardt, L., Λ_{e3} decay as a test of V-A theory 123–125
12. Dubois, J. and Maripuu, S., Radiative proton capture in Sc^{45} 127–149
13. Nagel, B., Angular distribution and polarization of K shell photoelectrons in the high energy limit 151–159
14. Lindskog, J., Sundström, T., Lindström, J. O. and Sparrman, P., Determination of the electromagnetic transition probabilities in the ground state decay of Au 199 161–169
15. Gerholm, T. R. and Lindskog, J., A magnetic coincidence spectrometer for the measurement of short nuclear lifetimes 171–198
16. Lindskog, J. and Sundström, T., Improved experimental methods for measurements of nuclear lifetimes down to 10^{-11} seconds 199–220
17. Frisk, Å., Evidence for a Σ hyperon-pion resonance at 1404 MeV with narrow width 221–244
18. Matthias, E., Olsen, B. and Schneider, W., Influence of a combined magnetic dipole and non-axially symmetric electric quadrupole interaction on angular correlations 245–255
19. Bergvall, P., Lindström, B. and Hatch, E. N., Search for an isomeric shift in the Ka_1X-ray of Tm^{169} 257–267
20. Lindgren, E. R., Liquid flow in tubes. VIII. Influence of roughness upon the transition process 269–283
21. Hoh, F. C., Instability of gas discharges in a magnetic field 285–302
22. Sigfridsson, B., An automatically gain controlled pulse-amplifier . . . 303–310

23. Sigfridsson, B., The high-frequency deflection method for measuring short half-lives. Part 3. The time calibration, the shape of a time-resolution curve and a description of some of the electronic equipment . . . 311–328
24. Uhler, J., Investigation of contamination properties with emphasis on broad range isotope collection in an electromagnetic separator of the 90° sector type 329–348
25. Uhler, J., On the use of an electromagnetic isotope separator in a wide energy interval 349–367
26. Uhler, J. and Rossi, J., Investigations of some properties of isotope separator beams of different charge states 369–376
27. Davies, J. A., Domeij, B. and Uhler, J., The range of Kr^{85} ions in aluminum and tungsten in the energy interval 2–600 keV 377–388
28. Bergström, I., Davies, J. A., Domeij, B. and Uhler, J., The range of Rn^{222} ions of keV energies in aluminum and tungsten 389–398
29. Domeij, B., Bergström, I., Davies, J. A. and Uhler, J., A method of determining heavy ion ranges by analysis of α-line shapes 399–411
30. Uhler, J., Domeij, B. and Borg, S., Range distributions of W^{187} ions of keV energies in tungsten 413–419
31. Uhler, J., Forsling, W. and Åström, B., Mass separated alpha activities produced by carbon ion bombardments on thallium, lead and bismuth targets 421–428
32. Hankla, A. K., Hamilton, J. H. and Stockendal, R. V., K internal conversion coefficients of transitions in Ba^{134} 429–437
33. Brander, O., A note on the transition operator for nucleon-nucleon scattering in the presence of a hard core 439–449
34. Persson, L., Ryde, H. and Oelsner-Ryde, K., Levels in Tb^{157} populated in the decay of Dy^{157} 451–478
35. Nagel, B., Some integrals and expansions related to the hypergeometric functions F_1 and Φ_2 in two variables 479–493
36. Waller, I., On the emission and absorption of γ-rays by an impurity atom in a crystal 495–502
37. Frey, W. F., Hamilton, J. H. and Hultberg, S., Angular distributions of photoelectrons ejected from uranium by 158 keV and 208 keV gamma rays 503–510
38. Zazula, P. and Wilhelmsson, H., Surface ionization phenomena investigated by mass spectrometric determination of the ion inital velocity distribution 511–527
39. Jayasimha, P. and Murty, G. S., On the theory of stability of a current-carrying annular mercury cylinder 529–541
40. Nilsson, T. and Sjöstrand, N. G., The diffusion parameters of thermal neutrons in heptane 543–548
41. Eriksson, K. B. S. and Isberg, H. B. S., O I quintet and triplet terms below the ionization limit 549–558
42. Johansson, C. H. and Sjölin, T., Luminosity at the transmission of detonation in water 559–568
43. Vallin, J. and Beckman, O., Pulse echo method for measurement of ultrasonic velocity 569–574
